

## Type Crew - Length 180 cm

by designer uridan a/s

**Model:** GR1800-3  
**Material:** glass fibre reinforced plastic (GFP)  
**Installation:** horizontal or vertical

### Installation of the uridan® water free urinals is very simple.

If you have earlier had water flush urinals, the drainpipe should be cleaned before installation of uridan® urinals. Ensure that existing sewer pipes are well cleaned and don't have pre-existing blockages.

uridan® urinals work without water, and therefore should only be connected with  $\varnothing$  50 mm drainpipe. Installation should be carried out by authorized plumbers.

1. Fix bracket no. (8) with 2 screws of 8x80 mm, the trough hangs on this bracket.
2. Fix the screen with 4 screws of 8x60 mm.
3. Slide the trough down over bracket no. (8) ensuring the waste trap is secure.
4. Insert the small PVC pipe (B) in the water lock and afterwards fill the water lock with water.
5. Insert the stainless steel cover (A).
6. Then pour 1 bottle of 0,3 liter urilock® over the cover. **Important!** Never pour urilock® fluid before the stainless steel cover is insert.
7. Apply silicon sealant between the trough and the wall.
8. The uridan® urinal is now ready for use!

If the troughs should be installed side by side or as extension to each other, there must be a distance of minimum 150 mm between the troughs. The non water troughs can be used for both horizontal and vertical drainpipe. In case of horizontal installation, the distance from the floor to the centre of the drainpipe should be 225 mm.

**Please leave customer care booklet, uriclean® cleaning detergent and hook with customer.**
